

ABHIRAAM S

Software Engineer — Java Full-Stack Developer — Python & ML Specialist

Bengaluru, Karnataka — +91 89516 77529 — abhiraams2004@gmail.com

linkedin.com/in/abhiraam-s-84388125b — github.com/icemberg

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in Java, Python, Spring Boot microservices, and full-stack development. Proficient in REST APIs, MySQL, Redis caching, and React. Strong in Data Structures & Algorithms, OOP, Testing (JUnit, Mockito), and Machine Learning. Experienced with Docker, CI/CD, AWS/GCP, and Agile development. Proven ability to deliver production-ready solutions.

EXPERIENCE

Java Developer Trainee

Feb 2024 – Present

HulkHire Tech, Hyderabad, India

- Built Spring Boot microservices for Stripe payment integration with REST APIs, webhook processing, Spring Security, HmacSHA256, JWT, and OAuth2 authentication; deployed on AWS (EC2, RDS) with Docker and CI/CD
- Implemented Redis caching for business rules and session management, reducing database load and improving API response times; designed modular architecture (Controller-Service-Repository) with MySQL and Spring Data JPA
- Developed comprehensive unit tests using JUnit and Mockito for code coverage; awarded STAR Performer for delivery excellence

AI/ML Intern

Present

VisionAstraa EV Academy, Bengaluru, India

- Developing machine learning models for Electric Vehicle performance optimization using Python, scikit-learn, and data science techniques

TECHNICAL SKILLS

Programming: Java, Python, C++, JavaScript, SQL, HTML5, CSS3

Java & Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, Maven

Frontend: React.js, Node.js, Material-UI, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB, Redis Cache, Query Optimization

Testing: JUnit, Mockito, Unit Testing, Integration Testing, TDD

Cloud & DevOps: AWS (EC2, RDS, S3), GCP, Docker, Kubernetes, CI/CD, GitHub Actions

Data Science & ML: scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Machine Learning, NLP, LangChain, LangGraph

Tools & Core CS: Git, IntelliJ IDEA, Postman, JIRA — DSA, OOP, System Design, DBMS, Agile/Scrum

TECHNICAL PROJECTS

BrainBlast – Full-Stack Quiz Application

Java, Spring Boot, Spring Security, MySQL, Redis, React.js, JWT, OAuth2, Material-UI

- Developed full-stack platform with Spring Boot REST APIs (MVC architecture), Spring Security with JWT/OAuth2, MySQL with Spring Data JPA, Redis caching, and responsive React UI with Material-UI for quiz gameplay and admin dashboard

Map-Matching Algorithm – Machine Learning Project

Python, scikit-learn, HMM, Random Forest, GeoPandas, Data Science

- Architected ML pipeline using Hidden Markov Model and Random Forest achieving 15% accuracy improvement over baseline; engineered spatial-temporal features using Python, Pandas, and NumPy for geospatial data processing

Web Scraping & RAG Dataset Generation Pipeline

Python, FastAPI, Playwright, spaCy, T5 Transformer, Vector Embeddings

- Created automated AI pipeline for Q&A dataset generation using Playwright web scraping with asynchronous processing; developed text chunking and summarization using T5 transformer
- Built vector embeddings storage for RAG workflows enabling semantic search and deployed RESTful endpoints via FastAPI

Video Summarizer – AI System — Python, Phidata, Gemini LLMs, NLP

- Built AI video summarization platform using Phidata, Gemini APIs, and NLP pipelines for content extraction and also built a RAG pipeline in Langchain.

EDUCATION

Bachelor of Engineering – Computer Science

2022 – 2026 (Expected)

Bangalore Institute of Technology (BIT), Bengaluru

CGPA: 9.01/10

Coursework: DSA, OOP, DBMS, OS, Software Engineering, Machine Learning

CERTIFICATIONS & ACHIEVEMENTS

AWS Cloud Practitioner (2024) — ML with Python (2024) — Infosys AI & ML (2024) — MERN Stack (2024) — Docker (2024) — Linux (2022) — GSSoC & Hacktoberfest Contributor (2024) — STAR Performer – HulkHire — LeetCode & HackerRank Active
